

Forge Motorsport Carbon Engine Cover Handling Advice

These are just a few tips of how to handle and install our carbon engine covers.

Fitting:

- When fitting the engine cover, remember to remove the original rubber mounting grommets
- With the grommets fitted, spray them with silicone spray or soapy water to help fitting
- When mounting the carbon cover, make sure grommets are lined up with mounting pegs and push the cover down gently and smoothly

Removing

- When removing the carbon cover place your hand under the cover where the mounting grommet is located and pull upwards again with a gentle and smooth action
