

Performance air filters
for road and race vehicles

ITGHYUNDAII20N

Hyundai i20N Fitting Instructions

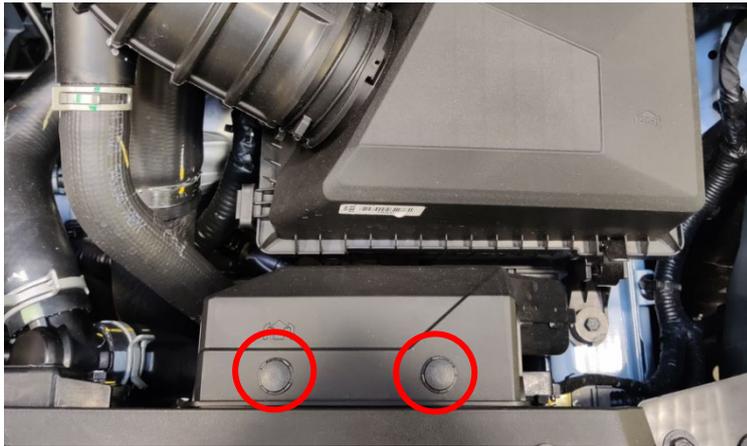

Performance air filters
for road and race vehicles

Removal of the Stock Intake

- 1) Remove the 2x trim clips holding down the standard airbox feed.

Prize upwards as shown, with a small flathead screwdriver or trim removal tool.

Remove from the car.

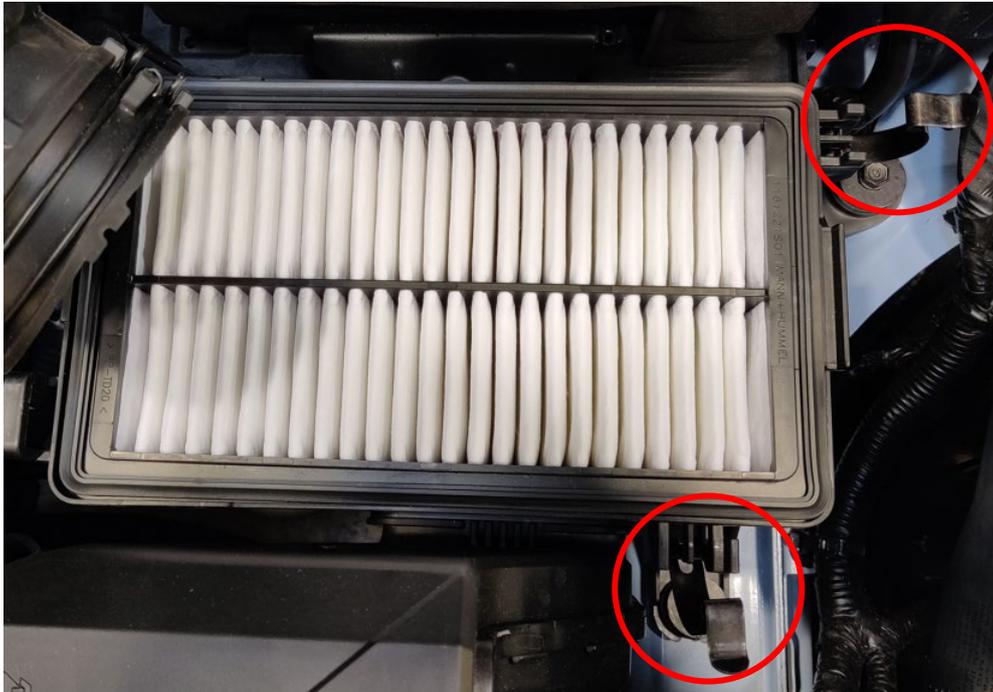

- 2) Using a 10mm Socket, loosen the hose clip circled below.

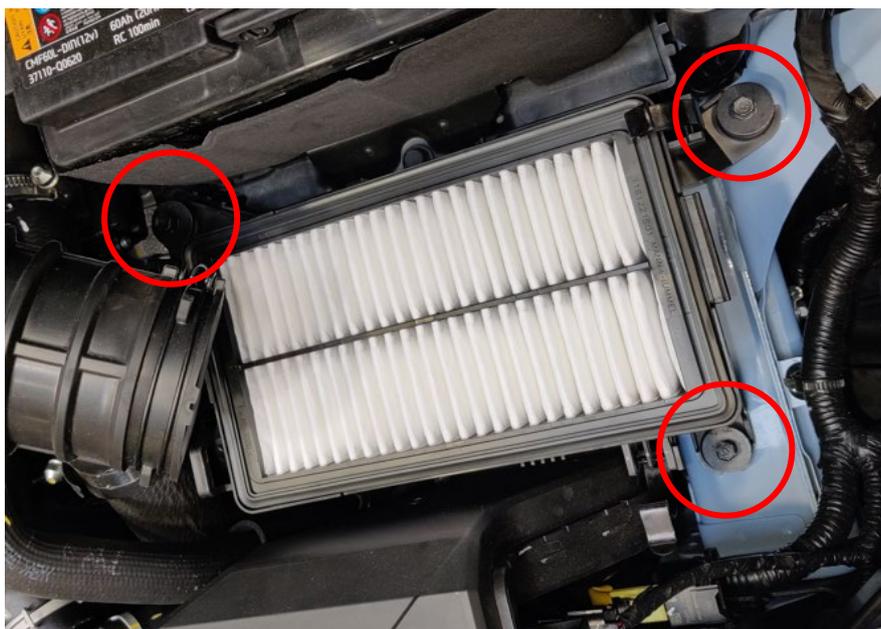

Performance air filters
for road and race vehicles

- 3) Undo the 2x airbox securing clips and remove the airbox lid.

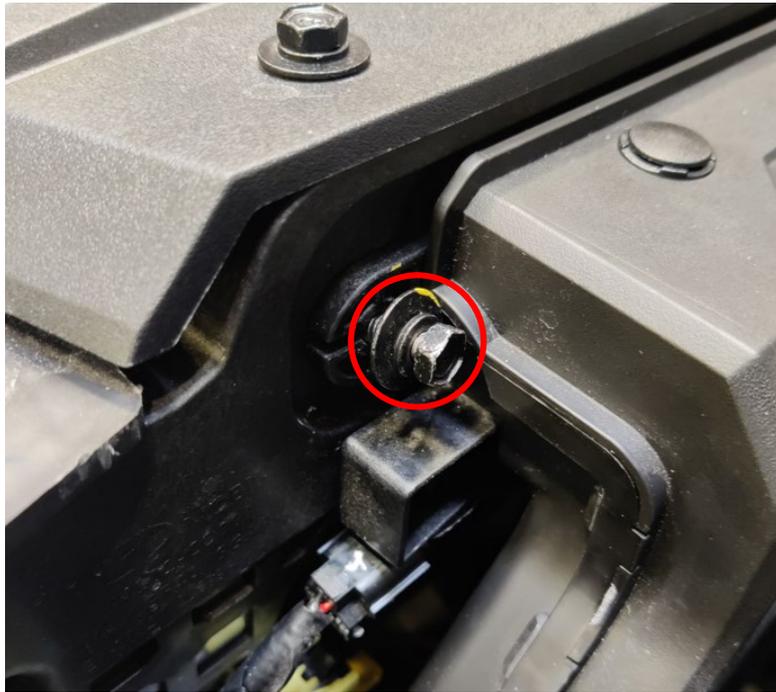

- 4) Remove the 3x airbox mounting bolts (10mm Socket) and lift the lower airbox/scoop out of the engine bay in one piece.

Performance air filters
for road and race vehicles

- 5) Remove the nearside bolt from the front intake scoop panel (10mm socket).

for road and race vehicles

Fitting the ITG Induction Kit

- 1) Rest the heatshield into place, lining up the 3x mounting holes.

Loosely fit the 3x Supplied Bolts/Spring Washers & Penny Washers.

- 2) Tighten down the 3x bolts, to secure down the heatshield to the chassis.

Performance air filters
for road and race vehicles

- 3) Take the airbox & filter assembly & slot this into the main hole in the heatshield.
Next, slot the filter's neck into the hose & rotate the airbox assembly until the logo is facing upwards.

- 4) Re-tighten the hose clamp on the end of the OE hose (10mm socket)

for road and race vehicles

Fitting the Silicone Upgrade Hose (Optional Extra)

1) Squeeze the 2x hose clips (with pliers or hose clip removal tool) and pull both hoses off the main intake hose.

Performance air filters
for road and race vehicles

2) Next, loosen the 2x hose clips on the turbo and airbox lid. (10mm Socket).

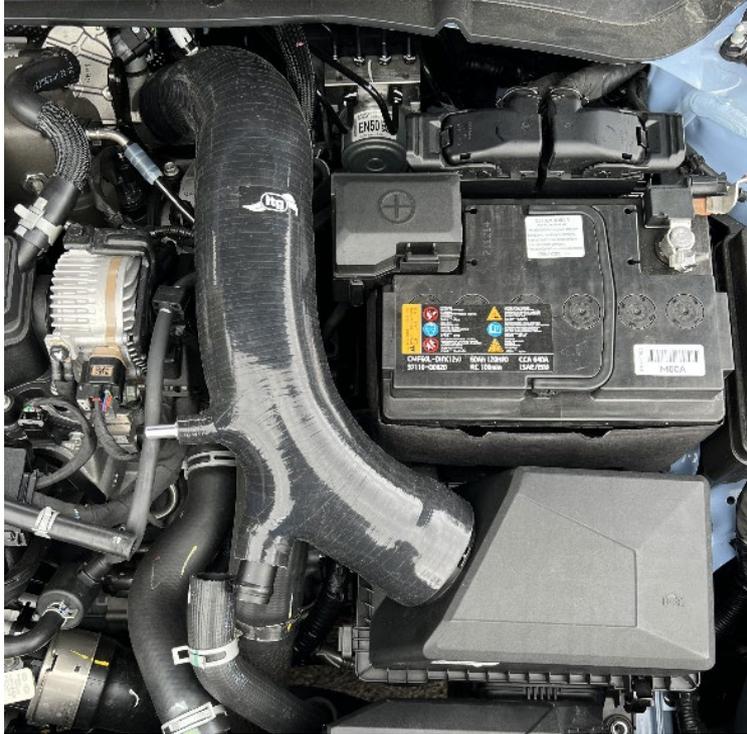

3) Pull the hose off the turbo & the airbox lid – remove from the car.

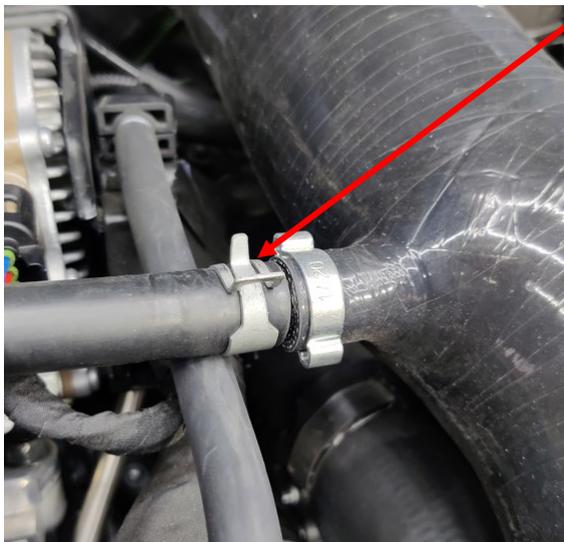

Performance air filters
for road and race vehicles

4) Fit the ITG silicone intake hose, rotating it around until you are happy with the positioning.

5) Connect up the 2x ancillary hoses to the main hose & re-seat the hose clips over the spouts.

Performance air filters
for road and race vehicles

6) Tighten up the hose clips on the turbo & airbox lid.
